THE GUIDE TO GREEN

A directory of financial and technical assistance programs for businesses in the City of Commerce
INTRODUCTION

The Guide to Green: A Directory of Financial and Technical Assistance Programs for Businesses in the City of Commerce

The City of Commerce, the “Model City,” is situated in the heart of a national distribution and manufacturing hub with access to major highways and a bustling shopping center. As the drivers of our local economy, small- and medium-size businesses appreciate the cooperative pro-business attitude and financial incentives enabling them to contribute to our local employment and overall quality of life.

Businesses owners and operators have been pleasantly surprised to learn that there are many additional programs offered by local, state, regional and federal agencies to assist companies to revitalize and expand their operations, saving them money and reducing pollution.

The City of Commerce Guide to Green second edition is provided as a community service to businesses in the City of Commerce and acts as a companion to the Green Zones policy adopted by the city in 2013. The Guide to Green lists voluntary programs that can assist companies with retaining and even increasing jobs while making the enterprise more efficient and profitable, and at the same time providing better safeguards for worker and community health and environmental quality.

With the availability of new technologies, low-interest financing and state-of-the-art training, many businesses can successfully transition from outmoded and inefficient equipment and production methods to more sustainable and non-polluting business operations. This transition to “green” can support small- and medium-size businesses as they revitalize their operations and move towards a sustainable future.

The Guide provides a comprehensive and easy-to-use overview of programs that are primarily focused on the needs of small- and medium-size businesses. While this directory is not exhaustive, it offers a substantial picture of available benefits including technical assistance, training, tax credits, rebates, loans and grants, along with points of contact with the various public agencies that sponsor these programs.

Michele Prichard
Director, Common Agenda
Liberty Hill Foundation

Mark Lopez
Director, East Yard Communities for Environmental Justice

October 2016
The Guide to Green was conducted in the fall of 2011 and was last updated in October of 2016. The Guide offers an overview of the range of business assistance programs that may be accessed through the City of Commerce, the County of Los Angeles and regional, state and federal agencies. Program benefits include technical assistance, training, tax credits, rebates, loans and grants.

We have attempted to identify as many programs as possible that may be relevant to businesses located in the City of Commerce. Because of the number and complexity of programs, as well as frequent changes, some worthwhile programs may have been overlooked. We welcome information on additional relevant programs: Please send information for updates to guide2green@libertyhill.org.

The Guide primarily focuses on programs that offer assistance to small- and medium-size businesses, but we have included listings for some programs that may be appropriate for large businesses as well. Geographical requirements for applicants vary, with certain programs limited to communities most in need as identified by federal criteria. Roughly half of the programs offer assistance for businesses to become greener (or “more environmentally sustainable”). The balance targets to stimulate business growth and support economic viability, with emphasis on “communities in need.”

Research for The Guide involved several stages of review of possible programs, as follows:

1. A preliminary list of programs was drawn up in the summer of 2010.
2. The initial list was reviewed and updated several times, most recently in October 2016.
3. Program information and application details were researched and verified online through agency/provider websites.
4. The application process for each program underwent a critical review to determine the ease of use by applicants and the availability of needed information.
5. The program criteria were evaluated to determine whether small- and medium-size businesses in Commerce would be eligible.
6. The researcher conducted phone interviews with agency representatives to obtain information and application details not found on websites or in application instructions.
7. Through phone interviews, emails and other outreach, the researcher evaluated each agency’s responsiveness to applicant queries.
In addition to the specific details found in each listing, some general findings may be useful to small- and medium-size businesses that use The Guide.

1. YOU CAN'T JUDGE A PROGRAM BY ITS WEBSITE
   There's a wide range in the quality of the websites for the programs included in this guide, but the availability and usefulness of a website is not necessarily a reflection of the availability or usefulness of the program. Computer access is necessary to apply to almost all programs we list, because even when application forms may be completed by hand and submitted through the mail, the forms must typically be printed out from a website.

2. DEADLINES SHOULD BE DOUBLE-CHECKED OR VERIFIED
   Many websites do not indicate opening or closing dates of programs, and many fail to indicate when the website content was published. Applicants should verify deadlines and ongoing availability of the program.

3. CUSTOMER SERVICE FOR APPLICANTS VARIES FROM PROGRAM TO PROGRAM
   Response to telephone and email queries was varied and did not fit any clear pattern by agency, region or program type. Some agencies offer phone contact information for inquiries, others offer email contact information. Some respond to applicant queries quickly, others require multiple follow-ups.

4. PROGRAMS TARGETED TO SPECIFIC DEMOGRAPHICS OR INDUSTRIES ARE THE MOST APPLICANT FRIENDLY
   Programs targeted to specific groups, such as small business enterprises (SBE), very small business enterprises (VSBE), minority-owned, women-owned or disability-owned enterprises (MBE, WBE, or DBE) appeared to be the most applicant-friendly. Our research also found this to be true for programs targeting a specific industry, such as metal finishing, auto repair or dry cleaning. Programs offering broad technical assistance (but not usually financial assistance) had the fewest barriers and offered specific services and providers.

5. WHAT APPLICANT-FRIENDLY PROGRAMS HAVE IN COMMON
   The most applicant-friendly programs had (1) an easy-to-use website, (2) an application that was short and easily obtained, (3) clear and simple financial reporting obligations, and (4) clear and simple requirements for supplementary documents.

Energy Efficiency Programs

DESCRIPTION
SCE provides incentive programs, technical assistance programs, tools, and educational and training opportunities to improve energy efficiency of business facility design, equipment, and operations.

ELIGIBILITY
These programs are designed for non-residential SCE customers; eligibility details are listed in the specific program descriptions below.

PRIMARY ENERGY EFFICIENCY INCENTIVE PROGRAMS
Express Solutions
Express Solutions are upgrades of existing equipment to more efficient options and are available to all business customers, regardless of size or energy use. Participants are paid on a per-unit basis, up to 100% of the project’s cost for qualified improvements to lighting, climate control, office equipment, refrigeration, food-service equipment, and water heating. Commercial, industrial, agricultural, or non-profit business customers with an active, valid SCE account are eligible; customers that generate electricity should contact their Account Representative or 1-800-990-7788 to determine eligibility.

The process is made up of the following steps:

1. Fill out the appropriate sections of the Incentives Application. View SCE’s Solutions Directory for eligible solutions and their solution codes, descriptions, qualification criteria and incentive amounts.
2. Applications for Express Solutions can be submitted for qualifying equipment that is already installed or for equipment that will be installed as part of a future comprehensive project including Customized Solutions.
3. Submit the completed application to SCE. If project installation is already complete, include the required supporting documentation (invoice, manufacturer’s specifications product sheet).
4. If installation is already complete, upon approval, SCE will issue an incentive check.
5. If installation will be completed after submitting the application, SCE will send an Installation Report. After installation is completed, submit the Installation Report with the required supporting documentation to receive an incentive check.

Customized Solutions
Customized Solutions are more tailored equipment upgrades that can attain deeper savings and higher incentive payments. Incentives are based on energy saved over a 12-month period, up to 50% of the total project cost. While Customized Solutions is available to all business users, eligibility criteria vary by program.

The process is made up of the following steps:

1. Fill out the appropriate sections of the Incentives Application. View SCE’s Solutions Directory for eligible solutions and their solution codes, descriptions, qualification criteria and incentive amounts.
2. Applications can be submitted for qualifying equipment that is already installed or for equipment that will be installed as part of a future comprehensive project including Customized Solutions.
3. Submit the completed application to SCE. If project installation is already complete, include the required supporting documentation (invoice, manufacturer’s specifications product sheet).
4. If installation is already complete, upon approval, SCE will issue an incentive check.
5. If installation will be completed after submitting the application, SCE will send an Installation Report. After installation is completed, submit the Installation Report with the required supporting documentation to receive an incentive check.

Express and Customized Solutions Directory
Energy Efficiency Programs (continued)

customers, regardless of size or energy use, tailored equipment is most often found in mid- to large-sized businesses. Express and Customized Solutions can also be combined under the scope of a single upgrade project. Commercial, industrial, agricultural, or non-profit business customers with an active, valid SCE account are eligible; customers that generate electricity should contact their Account Representative or 1-800-990-7788 to determine eligibility.

The process is made up of the following steps:

1. Fill out the appropriate sections of the Incentives Application. View SCE’s Solutions Directory for eligible solutions and their solution codes, descriptions, qualification criteria and incentive amounts.

2. Submit the completed application to SCE.

3. A qualified SCE contractor arranges a pre-inspection of existing equipment.

5. Proceed with the installation of project.

6. Complete and return the Installation Report with the required supporting documentation to SCE.

7. A qualified SCE contractor arranges post-inspection of the new equipment.

8. SCE will issue an incentive check.

SUBPROGRAMS

Building Operator Certification (BOC) & Training: For commercial customers interested in energy efficiency, SCE sponsors BOC training. Six courses are currently offered (five “Level 1” courses and one “Level 2” course). This certification improves job skills, and trains in the operation of more comfortable, efficient facilities. The BOC Level 1 certification program is designed for operators with two or more years experience in building operations and maintenance. Individuals interested in earning Level 2 certification in Equipment Troubleshooting & Maintenance must have met any one of these three qualifications:

A technical degree and three years of experience working in operations and maintenance of a commercial or institutional facility

A union membership at journey level and three years of experience

BOC Level 1 certification and four years of experience

CONTINUED ON NEXT PAGE
Business Energy Advisor
SCE provides customized recommendations to help business customers manage their unique energy needs. Take an online survey about your equipment and energy use, and build an energy plan for greater energy efficiency and better manage your bottom line.

SCE EnergyManager®
This web-based application helps businesses monitor, analyze, and report their energy usage. It is offered as three modules: SCE EnergyManager Basic®, SCE Cost Manager®, and SCE Bill Manager®. To be eligible, you must be a business customer with a monthly demand exceeding 200 Kilowatts at least three times in the past 12 months, and your business facility must have an approved interval data recorder (IDR) meter. Participation requires internet access, registration in SCE My Account, and an SCE-approved meter that can record usage at 15-minute intervals.

Statewide Savings By Design Program
Savings By Design encourages high-performance, non-residential building design and construction, and offers a variety of solutions to building owners and design teams.

- Owner Incentives: Financial incentives are available to owners when the efficiency of their new building exceeds the minimum Savings By Design threshold (10% better than Title 24).
- Design Team Incentives: A design team may qualify for incentives when the building design saves at least 10% and the owner agrees to participate in the programs. Other incentives are available.
- Design Assistance: Design assistance and consulting is offered at no charge to the Owner or the Design Team. The level of assistance provided for a project varies based on the program approach—Whole Building or Systems. Assistance may be as simple as providing plan review and recommendations or may be as involved as full energy modeling with financial analysis on multiple options for energy efficient systems. Receiving design assistance does not obligate the Owner to implement the design recommendations.
- Energy Resources: EDR offers a valuable palette of decision-making tools and resources that help make it easier to design, build, and operate energy-efficient buildings in California.

Continuous Energy Improvement
Southern California Edison (SCE) and Southern California Gas Company (SoCalGas®) have joined forces to offer the Continuous Energy Improvement Program (CEI), which provides an energy advisor and technical assistance to help qualifying business customers implement strategic,
ongoing energy-management practices. The program lasts two years for participants. To be considered for this initiative, customers must:

- Be a business customer of both SoCalGas and SCE.
- Have support from an executive sponsor within their organization.
- Be willing to commit financial and human resources to the CEI engagement, including designating a program point of contact who will be the CEI Project Manager/Energy Champion.
- Have the ability to clearly articulate business priorities and goals.
- Have incorporated, or be committed to incorporate, sustainability and energy efficiency into corporate goals, strategic planning, or messaging.
- Have training integrated into the company culture and processes.
- Have previous experience, or strong interest, in energy branding and certification (ISO 50001, LEED, ENERGY STAR, etc.).

**Direct Install**

Through Direct Install, a trained energy-efficiency contractor is sent to help small businesses identify ways to save electricity. The contractor looks at lighting, signage, refrigeration and more. If you wish to implement the recommended improvements— at no cost to you—the contractor can help you complete an authorization and schedule an installation appointment. Outdated, inefficient equipment may be replaced free with new energy-efficient models. Installation is free, too.

**Cool Planet Program**

As part of the Cool Planet Project, eligible business customers of select Southern California utilities (including SCE) are provided with membership into The Climate Registry along with ClimatEEfficient training and education in the field of energy efficiency and tools for organizations to calculate, verify, and publicly report their greenhouse gas emissions and reductions as a reward for installing efficiency projects and/or participating in Demand Response programs.

Benefits and eligibility:

Receive 1 year of membership to The Climate Registry, up to $5,000 in membership fees. Requires one of the following:

- 500,000 kWh savings
- Current enrollment and demonstrated participation in one approved Demand Response program
- Silver Level - Local Government Energy Leader Program

Receive 2 years of membership to The Climate Registry, up to $10,000 in
Energy Efficiency Programs (continued)

Membership fees. Requires one of the following:

- 1,000,000 kWh savings
- Current enrollment and demonstrated participation in two or more approved Demand Response programs
- Gold Level - Local Government Energy Leader Program

Receive 3 years of membership to The Climate Registry, up to $15,000 in membership fees. Requires one of the following:

- 1,000,000 kWh savings and current enrollment and demonstrated participation in one approved Demand Response program
- Platinum Level - Local Government Energy Leader Program

Eligible energy efficiency projects must be installed within the period of January 1, 2013 – December 31, 2016. Current Cool Planet members can rejoin with eligibility established by new energy efficiency projects installed between January 1, 2013 – December 31, 2016. Customers already enrolled in an approved Demand Response program can qualify by re-enrolling in the same or another Demand Response program. Approved SCE Demand Response Programs (see also the SCE “Demand Response Programs” entry on page 15 of this Guide to Green):

- Capacity Bidding Program (CBP)
- Summer Advantage Incentive (SAI), also known as Critical Peak Pricing (CPP)
- Demand Bidding Program (DBP)
- Aggregator Managed Portfolio (AMP)

Self-Generation Incentive Program (SGIP)
SGIP, which provides rebates to support participants in generating their own power, is currently undergoing changes. Check back at the program website for updates: www.sce.com/sgip.

Contractor and Vendor Directory
SCE has a list of contractor and vendor professionals to help businesses with energy efficiency projects.

SCE’s Energy Education Center
SCE offers free classes in lighting, HVAC, motors and drives, irrigation. There are offerings at both the Irwindale and Tulare locations, as well as on-location offerings.
PROGRAM

Demand Response (DR) Programs

DESCRIPTION
DR is a means to reduce demand quickly during times of strain on the electrical system. DR helps to smooth out the demand curve, reducing the financial and environmental costs associated with serving peak demand. By reducing energy consumption during hours of peak demand, customers relieve stress on the grid, the environment, and their bottom line. SCE invites customers to participate in one or more of our DR programs to reduce energy use in return for lower energy costs.

ELIGIBILITY
Non-residential customers.

SUBPROGRAMS

Critical Peak Pricing (CPP) - During the hottest months, when energy use hits its peak, prices are also at their highest. Businesses can save money and help relieve demand by voluntarily reducing energy consumption or shifting to off-peak hours during CPP events.

Capacity Bidding Program (CBP) and Aggregator Managed Portfolio (AMP) Program - Businesses can earn incentives from third-party aggregator, for reducing their energy use during CBP and AMP events. These programs offer flexibility, by working and contracting with an aggregator, to determine participation level, preferences, and incentives.

Demand Bidding Program (DBP) – This is a year-round, penalty-free, bid based program that offers business customers of all sizes bill credits for voluntarily reducing energy usage when a Demand Bidding event is called. Participants must bid a minimum of two consecutive hours during the DBP timeframe which can be Monday through Friday between the hours of noon and 8:00 p.m. any time of the year, excluding holidays.

Automated Demand Response (Auto-DR) Technology Incentive Program – Businesses can receive incentives to offset the costs of installing technologies (e.g. energy management systems), through the Auto-DR program. The installed technology helps automate participation and reduce energy usage during a DR event. Participating customers qualify for Auto-DR incentives and will also start seeing bill savings.

Permanent Load Shifting (PLS) – Air conditioning costs can add up, especially in Southern California’s summer climate. Businesses with considerable cooling load may qualify for incentives that can help shift some on-peak energy use to off-peak hours, by installing a Thermal Energy Storage system.

NOTE
For up-to-date information on program-specific eligibility requirements and incentive information, please refer to SCE’s website.

PROGRAM

Commercial Heating, Ventilation and Air Conditioning (HVAC) Optimization

DESCRIPTION
HVAC Optimization is a uniquely holistic and technically comprehensive set of energy efficiency programs for commercial HVAC systems. Each program is designed to bring a new level of performance and energy efficiency of specific components of your HVAC unit and ductwork. Regularly scheduled maintenance and testing over the course of a Maintenance Agreement ensures the benefits of elevated performance and efficiency persist over time.

Incentives offset costs associated with quality maintenance practices, advanced retrofit and air delivery renovation projects, and high-performance HVAC units.

The HVAC Optimization teams offers support to contractors to implement the program. Program support includes Sales and Operations training, technician training facilitation, technical support, customer site inspections, and administrative support.

Quality Maintenance elevates the performance of HVAC units with 3-year Maintenance Agreements between specially-trained HVAC contractors and their customers. Financial incentives from SCE help offset the incremental cost of the enhanced maintenance. 20% of incentive is disbursed upon approval of agreement, 25% at the end of year 1, 35% at the end of year 2, and 20% at the end of year 3.

Quality Renovation targets and eliminates specific points in HVAC ductwork where energy is being wasted, ensuring conditioned air is delivered as efficiently as possible.

Early Retirement offers new, high-efficiency HVAC units at a reduced cost to SCE customers with old, but still operational, HVAC units.

ELIGIBILITY
All SCE commercial customers including, but not limited to: large and small offices, churches, schools, food stores/grocery, health/medical facilities, restaurants, malls/retail and miscellaneous commercial.

Eligibility requirements include:
- Site must be a nonresidential facility located within SCE’s service territory.
- Customer or tenants occupying the site must pay the Public Purpose Program surcharge, on the SCE electric meter, where the Program’s tasks are performed (unless otherwise exempted).

Commercial Heating, Ventilation and Air Conditioning (HVAC) Optimization (continued)

Requirements
Financial stability (e.g. credit rating, amount of revenue): An active, valid and non-delinquent SCE customer account is required, along with a U.S. federal tax ID.
Minimum/Maximum number of employees? No.
Does the application process require computer skills? No, qualified HVAC Optimization contractors are able to provide paper application documents for ink signature.
Does the application process require additional technical assistance to complete? No.
What kind of supplemental documents will they need? Completed Federal W-9 and completed California 590.
PROGRAM

On-Bill Financing (OBF)

DESCRIPTION
On-Bill Financing is (OBF) designed to facilitate the purchase and installation of qualified energy efficiency measures. The loan payment is estimated based on the amount of projected energy savings. The OBF Program provides zero percent interest financing and loan repayment through the customer’s energy bill.

Specific loan limits vary by business segment:
- $5,000 to $100,000 Commercial, Industrial, Agricultural
- $5,000 to $250,000 Taxpayer Funded Schools, Public Sector, Government and Institutions, Partnership Programs

Government & institutional customers are eligible for loans of up to
$1 million per service account for unique opportunities to capture large energy savings
All customers limited to 10% of the loan budget

ELIGIBILITY
To participate in On-Bill Financing, Business customers must apply for one or more of the following programs:
- Core – Express & Customized Solutions
- Third Party Programs
- Partnerships (Local Govt. | Institutional)
- Retro-commissioning (RCx)

APPLICATION ACCESSIBILITY AND USABILITY

Website
There is a user-friendly website that contains basic contact information.

Requirements
Financial stability (e.g. credit rating, amount of revenue): Must have an active SCE account for a minimum of the last two years and be in good credit standing with SCE without:
- Disconnection notices in the past two years
- 48-hour shut-off notices in the past two years
- Returned checks in the past 12 months
- Deposit on account in the past 12 months
- 3 or more past due notices in past 12 months
- Tax Payer ID / SS# must match SCE’s billing system

**PROGRAM**

**Business Assistance Programs**

**DESCRIPTION**

The Los Angeles County Economic Development Corporation (LAEDC) provides a business retention program to attract, retain, and expand businesses in L.A. County. The program provides a central point of contact for factual and timely information on a broad range of business development and location factors. Services include project management; help with permitting, incentives, workforce development and financing assistance; and connections to public/private resources, cities and regional EDCs. Business assistance coordinators provide demographic, economic and real-estate information about the broader L.A. County region. There are also regional managers who provide assistance to existing or new businesses that fall within their geographic area. A list of programs and resources are listed in the Notes section below.

**ELIGIBILITY**

Any business in L.A. County

**APPLICATION ACCESSIBILITY AND USABILITY**

**Website**

There is a user-friendly website that contains basic contact information.

**Application**

There is no application form; register to obtain assistance.

**NOTES**

**Advanced Transportation**: A new Southern California promoting alternative fuel and advanced vehicles to drive regional clean vehicle innovation. Additionally, the e4 Mobility Alliance promotes advanced transportation in Southern California including maximizing plug-in electric, natural gas and fuel cell vehicle adoption rates; fleet conversion; ride sharing and a range of e-mobility solutions that will enhance a robust manufacturing cluster and infrastructure deployment resulting in job growth and investment through appropriate levels of public and private funding; technology transfer; workforce development; and policy initiatives.

**Commercial and Industrial Property Site Search**: LAEDC’s Business Assistance department will conduct a no-cost, no-obligation, and confidential site search anywhere in Los Angeles County. This free service is available for start-up businesses as well as existing business

Business Assistance Programs (continued)

seeking to relocate or expand. Links are provided to a Site Search form as well as a variety of resources for site selection. After filling out and emailing the Site Search Form a property site search report will be emailed back to the requesting business within 5 working days. Site searches are available for commercial property only, including Office, Industrial, Warehouse, Distribution, Retail, and Land.

Innovate LA: A private-sector initiative in collaboration with the LA Mayor's Council on Innovation and Industry, bringing together leaders of innovation, technology and creative communities to galvanize, accelerate and promote LA County's robust innovation ecosystem.

Layoff Aversion: LAEDC partners with the Los Angeles County Workforce Investment bureau to provide free consultation services for businesses with at least 10 employees to help businesses retain jobs. Services include resources for financing, tax credits, transition of ownership, real estate issues, permitting, utility problems, tax problems, staff hiring and training, and cost containment.

World Trade Center Los Angeles (WTC LA): WTC LA offers businesses the opportunity to expand in the international market through a variety of cooperative regional efforts, combining the numerous public and private trade resources available. In-house experts provide businesses with the basics of trade, individual export and import counseling; personal referrals to state and federal agencies for trade promotion; investment attraction; and the use of a state-of-the-art online database for market research and trade leads. Strategic partnerships exist with the City and County of Los Angeles, the Port of Los Angeles, the Los Angeles Chamber of Commerce and the Los Angeles International Airport.

Economic Development Toolkits: LAEDC partners with many economic development organizations and their website links to a variety of toolkits that are designed to provide electronic sources of Los Angeles County's business incentives, service providers, educational institutions, venture capital sources and annual conferences dedicated to the support of businesses.
PROGRAM

Vehicle and Engine Upgrades

DESCRIPTION
This set of programs encourages the immediate use of commercially available, low-emission mobile and stationary technologies. A variety of financial incentives, which include grants for incremental funding, subsidies, or vouchers, are designed to promote voluntary introduction of new technologies on an accelerated schedule. These incentives also provide manufacturers with justification to gear up for mass production of cleaner technologies.

ELIGIBILITY
Varies by subprogram

ACCESSIBILITY AND USABILITY
Website
There is a user-friendly website that contains basic contact information.

SUBPROGRAMS

Carl Moyer Program
Provides grants for owners of diesel engines to exceed regulatory requirements by retrofitting, repowering or replacing engines with newer and cleaner ones. The grants cover some or all of the cost difference of cleaner than required engine, vehicle, and equipment upgrades. The program focuses on cleaning the air by replacing older heavy-duty diesels with electric, alternative-fuel, or cleaner diesel technologies.

Any Mobile Source public or private project that results in cost-effective PM and/or NOx reduction not subject to current regulations or within 3 years of a regulatory compliance deadline is eligible. Must operate 75% within AQMD boundaries and vehicles and equipment funded must remain in operation for at least 3 years. Projects must meet the criteria described in the latest Carl Moyer Program Guidelines and all current Program Advisories, be in compliance with Off-Road or On-Road Diesel Regulations, meet the cost-effective threshold of $17,720 per weighted ton of total reduced emissions, and be fully operational and completed prior to May 19, 2017.

Projects may include: On-and off-road heavy-duty vehicles, construction and cargo handling equipment, marine vessels, shore power and locomotives. There is a nineteen-page application and a specific supplemental application form for each category of equipment. Funding depends on cost-effectiveness and emission benefits of project. Not all programs are offered by AQMD for 2016. For more information, contacts are listed for each project type in the sidebar.

Vehicle and Engine Upgrades (continued)

Goods Movement Emission Reduction Projects (Prop 1B)
Provides funding in partnership with the California Air Resources Board (ARB), for projects that reduce emissions from goods movement operations beyond those required by law. Types of equipment include: heavy-duty diesel trucks (replacement or repower), truck stop or distribution center electrification infrastructure, locomotives, ships at berth (e.g., shore power), commercial harbor craft, and cargo handling equipment at ports or rail yard facilities. The projects funded by the Prop. 1B Program must achieve “early or extra emission reductions” that are not required by a law or regulation.

As of the release of this document, no funding is currently being offered. For more information about program updates, workshops and future funding cycles, go to ARB’s program website or sign up for the gmbond listserv (see sidebar).

Mobile Source Credits
Regulation XVI - Mobile Source Offset Programs provides opportunities to generate mobile source emission reduction credits (MSERCs) from on- and off-road mobile sources. Mobile source programs are based on a variety of purchase, retrofit, repower, or scrapping projects. MSERCs, once approved by the AQMD, can be traded or sold on the open market and used to offset emissions from stationary sources, employee commute programs, or RECLAIM. Each rule has specific requirements that must be followed. Before implementing any MSERC program you should read the rule carefully and review all application forms, plan forms, and fee schedules. See MSERC website for licensed scrappers and Emission Credit Vendor listings and complete information on rules listed below.

The web addresses for the following rules are listed in the sidebar on the following page:
- Rule 1610 - Old-Vehicle Scrapping
- Rule 1612 - Credits for Clean On-Road Vehicles
- Rule 1613 - Credits for Truck Stop Electrification
- Rule 1620 - Credits for Clean Off-Road Mobile Equipment
- Rule 1623 - Credits for Clean Lawn and Garden Equipment

Surplus Off-Road Opt-In for NOx (SOON) Program for Off-Road Diesel Vehicle Clean-Up
Program provides funding assistance to applicable fleets for the purchase of commercially-available low-emission heavy-duty engines.
to achieve near-term reduction of NOx emissions from in-use off-road diesel vehicles. In 2008, the AQMD Board approved setting aside funding for this purpose. The AQMD is currently seeking off-road engine repower or vehicle replacement projects under the SOON Program. All large fleets with a total statewide equipment horsepower over 20,000 hp must apply for funding. Fleets below 20,000 hp may voluntarily participate in this program.

Voucher Incentive Program (VIP)

The goal of this program is to reduce emissions from in-use heavy-duty trucks in small fleets. The VIP is implemented by AQMD through contractual agreements with AQMD-approved VIP participating dealerships, dismantlers or retrofitters. Voucher amount will be deducted from the total cost. Funds are offered on a first-come, first-served basis with a maximum of $45K per truck for replacements and $10K for retrofits. The VIP website has a list of participating vendors and a downloadable application.

Eligible owners/operators have fleets of 3 or fewer vehicles that have been operating at least 75% (mileage-based) in California during the previous two years and must submit two years proof of ownership (with no lien holder for truck replacements), registration and insurance as well as a history of fuel consumption or miles driven. Exemptions exist for those who have been on active military duty during the past two years. The following original manufacturer Gross Vehicle Weight Ratings ranges must be met: Light heavy-duty vehicles (14,001-19,500 pounds), medium heavy-duty vehicles (19,501-33,000) and heavy heavy-duty vehicles (33,001 pounds or greater). Vehicle purchases or retrofits must be voluntary and not required by any local, state, or federal regulations and projects may not be used to generate a compliance extension or extra credit for determining regulatory compliance.
**PROGRAM**

**Solar Energy Equipment Credit**

**DESCRIPTION**

The AQMD Solar Energy Fee Credit is an annual equipment fee credit offered to companies that have solar panels installed at the facility where the business already has a permit from AQMD to operate certain equipment.

**ELIGIBILITY**

Permittees required to pay an annual operating permit renewal fee receive an annual fee credit for solar energy equipment installed at the permitted site. Credit is determined at the rate of $1.79/1,000 Btu up to all annual on-site permit renewal fees. Projects that receive grant funding from the Rule 1309.1—Priority Reserve account are ineligible.

**APPLICATION ACCESSIBILITY AND USABILITY**

Website
There is little information about the credit or contacts online.

Application
An application is not necessary. In order to request a solar energy fee credit, businesses need to answer 6 questions for each facility (see below). The process is moderately user-friendly.

Requirements

Financial stability (e.g., credit rating, amount of revenue): No, good credit is not required.

Minimum/Maximum number of employees? No.

Does the application process require computer skills? No.

Does the application process require additional technical assistance to complete? Possibly.

What kind of supplemental documents will they need? The following information and/or documentation must be provided for each facility:

- Make and number of modules
- Inverters’ make and rating
- Date of completed installation, or start of generating electricity
- BTU/hr system rating when credit was requested
- Whether funding was received pursuant to AQMD Rule 1309.1
- Letter from the applicable utility service—either SoCal Edison or LADWP—verifying that the system is connected to the utility grid

PROGRAM

Small Business Assistance Office

DESCRIPTION
The AQMD Small Business Assistance Office helps small and medium-size business owners to comply with AQMD air quality rules and regulations, permit conditions, and record-keeper through a variety of services offered and “No Fault Inspections.” They help small business operators find out which rules apply to their operations, how to meet AQMD requirements, and how to keep records. They act as advocates for the small business owners/operators within AQMD. Interested businesses should contact by phone. AQMD states they will respond quickly to requests.

ELIGIBILITY
All businesses with 100 or fewer employees or with annual gross revenues up to $5 million are eligible for this free on-site and over-the-counter, or phone technical consultation service.

APPLICATION ACCESSIBILITY AND USABILITY

Website
There is a user-friendly website that contains basic contact information.

Application
The application is moderately difficult. Assistance can be sought by phone or email.

Requirements
The applicant needs to be able to describe the nature of the business and should have reviewed the permit application forms in advance.

NOTES

Free Technical Assistance: AQMD provides free technical consultations either on-site, by phone, through e-mail, or at AQMD Headquarters on request. They will help businesses understand permit conditions, rule requirements and proper record-keeper; determine if equipment, processes or operations require permitting or registration; identify areas of non-compliance and develop strategies to achieve compliance; and provide assistance and liaison with other agency staff on permit processing, application filing, regulatory compliance, and fee issues.

Variance Petitions: If businesses cannot comply with air pollution control laws, and need temporary relief while working toward a solution without being subject to penalties, they may need to obtain a variance. AQMD provides assistance to small businesses in preparing for variance petition filings with the Hearing Board.
Small Business Assistance Office (continued)

Dry Cleaner Grant Program: See AQMD’s Dry Cleaner Grant Program listed in the State section of this guide for more information about this program which helps dry cleaners convert to non-perchloroethylene, cleaning systems such as professional wet-cleaning and CO2.

Fee Review Committee: The AQMD fee review committee resolves permit fee issues between regulated businesses and AQMD and can provide additional time for payment of current or past due permits, annual renewals, and other fees (such as annual emissions and Toxic Hot Spot fees) for businesses experiencing financial hardships. A fee review request form is available online (see sidebar, previous page).

Clearance Letter Program: For City and County staff, California state law requires that business owners need to comply with the applicable permitting/registration requirements of the AQMD prior to the granting of an occupancy permit. This Air Quality Permit checklist (see sidebar, previous page) will help to determine what is necessary to obtain clearance from AQMD.

Events: AQMD hosts various small business events throughout the year to assist communication between business owners, AQMD staff, and AQMD Board members. AQMD encourages businesses to participate in these events, which are usually free of charge, and to provide feedback on the usefulness and helpfulness of the events, and to suggest additional areas of discussion that could be the subject of other events. The AQMD website includes a calendar of events.
**PROGRAM**

**Expedited Permit Processing Program**

**DESCRIPTION**
The Expedited Permit Processing Program assures expedited processing of permit applications and provides management oversight to ensure that the permit processing is completed in a timely manner.

**ELIGIBILITY**
All businesses are eligible.

**APPLICATION ACCESSIBILITY AND USABILITY**

- **Website**
  There is a user-friendly website on permits that contains basic contact information, but no separate program website for expediting.

- **Application**
  There is a user-friendly one-page application. The application for expedited permitting is filed concurrent with the application for the permit itself. The additional fee should be submitted with the combined permit application and expedite application. Expedition is not guaranteed since it is dependent on the availability of staff to work overtime.

**Requirements**
Businesses pay an additional 50% of the permit processing fee for each permit application to receive expedited permit processing.

PROGRAM

Certification Programs and Training

DESCRIPTION
AQMD has introduced several certification programs that are intended to increase confidence in products and services used by the permitted facilities that promote clean air. Products such as solvents or commercial cleaners must meet specific environmental qualifications to become certified. Certified Permitting Professionals are required to demonstrate expertise in the preparation of permit applications, thus ensuring applications are complete and in compliance. In addition to certification programs, AQMD provides compliance assistance training to enhance understanding of applicable air quality regulations, introduce new control technologies and assist industry with achieving and maintaining compliance with federal, state and local clean air requirements.

ELIGIBILITY
Varies by subprogram.

ACCESSIBILITY AND USABILITY
Website
There is a user-friendly website that contains basic contact information.

SUBPROGRAMS

PRODUCT CERTIFICATIONS

Clean Air Choices Cleaner Product Certification
AQMD’s new “Clean Air Choices Cleaners” is voluntary certification program for ultra-low-polluting commercial cleaning products. Manufacturers, suppliers and users can apply for certification which is valid for three years and can be renewed. To become certified, products must contain no prohibited ingredients in quantities over 0.1%, a VOC limit which at 10 grams per liter is more stringent than existing ARB requirements, and other meet environmentally preferable qualifications. See website for complete list of eligible products and prohibited ingredients.

Clean Air Solvent Certification
Rule 1171 - Solvent Cleaning Operations and Rule 1122 - Solvent Degreasers control VOC emissions from numerous uses of solvents. Effective January 1, 2003, both rules require cleaning materials used in repair and maintenance operations and cold cleaners to qualify as Clean Air Solvent (CAS). Manufacturers, suppliers, and users can apply

for certification of CAS that meet the following criteria: VOC concentration is no more than 25 grams of VOC per liter; composite vapor pressure is no more than 5 mm Hg of VOC at 20°C (68°F); reactivity is not higher than toluene; contains no compounds classified as Hazardous Air Pollutants (HAPs) by the federal Clean Air Act, Ozone-Depleting Compounds (ODCs), or Global Warming Compounds (GWCs).

PROFESSIONAL CERTIFICATIONS

Certified Permitting Professional (CPP) Program

The AQMD offers certification and the title “Certified Permitting Professional” (CPP) to individuals who successfully complete a CPP examination. CPPs are given limited access to AQMD facility information through the Data Access System (DAS) which can be accessed through AQMD’s web site. Also, the AQMD publishes a list of all CPPs and makes this list available to the public upon request. Training is not a requirement to take the exam but the program’s website lists a number of third party vendors offering CPP training courses.

Compliance Training

AQMD’s offers a variety of courses that provide participants with the opportunity to interact with AQMD compliance staff, learn more about existing and upcoming air quality regulations applicable to their industry and resources to assist industry in achieving their clean air goals. Pre-registration is required for all classes. Courses currently being offered by AQMD include:

- Asbestos Demolition & Renovation (Rule 1403)
- Certified Person (Rules 463 & 1178)
- Certified Inspector – Sumps and Wastewater Separators (Rule 1176)
- Combustion Gas Portable Analyzer Training & Certification (Rules 1146, 1146.1 & 1110.2)
- Controlling Fugitive Dust (Rule 403 & 403.1)
- Gasoline Transfer & Dispensing (Rule 461)
- Hexavalent Chromium (Rule 1469)

PROGRAM

Dry Cleaning Grants

DESCRIPTION
The grant program is for dry cleaners operating within the South Coast Air Quality Management District (AQMD) switch to a dry cleaning machine that does not use the toxic chemical, perchloroethylene (PERC).

ELIGIBILITY
Businesses operating within the 4-county jurisdiction of the AQMD are eligible. Grant funds are only available for cleaning equipment listed in the “Equipment Report: CO2 and Professional Wet Cleaning Technologies” (See sidebar) Additional equipment may be approved by AQMD on a case-by-case basis.

APPLICATION ACCESSIBILITY AND USABILITY

Website
There is a user-friendly website that contains basic contact information.

Application
There is a user-friendly one-page application.

Requirements
Financial stability (e.g. credit rating, amount of revenue): Must be in good standing with AQMD and show ability to finance the balance of the cost within 45 days and purchase and install the equipment within 90 days.

What kind of supplemental documents will they need? All of the following forms and instructions are available on website. All grant applications require forms1, 3, 4, and 5 and include a clear copy of the purchase agreement or invoice.

Application for financial assistance for alternative dry cleaning equipment purchases
Instructions for obtaining AQMD financial incentives to purchase non-perc alternative dry cleaning equipment
Terms and conditions for financial incentive grant program to assist dry cleaners to purchase non-perc alternative technologies
Business information request.

PROGRAM
Leaf Blower Exchange Program

DESCRIPTION
Professional gardeners and/or landscapers can trade in their old (but operational) backpack leaf blowers to get new low-emission/low-noise backpack leaf blowers available at a discounted price. In past years AQMD offered STIHL BR 500 leaf blower for only $200. This is the powerful low-noise 65 dB(A), low-emissions model with a suggested retail price of $469.

ELIGIBILITY
The program is available to professional gardeners and landscapers who live and work within the 4-county jurisdiction of South Coast Air Quality Management District (AQMD) region.

APPLICATION ACCESSIBILITY AND USABILITY
Website
There is a user-friendly website that contains basic contact information.

Application
An application is not necessary.

**PROGRAM**

**Energy Efficiency Rebates for Businesses (EERB)**

**DESCRIPTION**
The EERB program offers business rebates on qualifying energy-efficient natural gas-fired equipment and improvements that replace inefficient natural gas-fired equipment. Equipment qualifying for rebates includes (but is not limited to):

<table>
<thead>
<tr>
<th>Equipment Type</th>
<th>Rebate Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Commercial Boiler</td>
<td>$0.50-$34.00 / MBtuh</td>
</tr>
<tr>
<td>Space Heating Boiler</td>
<td>$0.50-$34.00 / MBtuh</td>
</tr>
<tr>
<td>Process Heating Boiler</td>
<td>$2.00 / MBtuh</td>
</tr>
<tr>
<td>Pool Heater</td>
<td>$2.00 / MBtuh</td>
</tr>
<tr>
<td>Steam Traps</td>
<td>$100 / unit</td>
</tr>
<tr>
<td>Pipe Insulation</td>
<td>$2.00-$3.00 / linear ft</td>
</tr>
<tr>
<td>Tank Insulation</td>
<td>$2.00-$3.00 / sq ft</td>
</tr>
</tbody>
</table>

Detailed equipment specifications are available online as well as a complete list of current rebate offerings.

**ELIGIBILITY**
Any commercial, industrial or agricultural customer with an active, valid and non-delinquent account. Equipment must be paid in full and installed prior to submitting an application. Customers who have received any rebates within the last five years from SoCalGas, or who have received rebates, incentives or services for the same equipment from other utilities, states or local programs funded by the Public Purpose Program Surcharge (PPPS) are not eligible.

**APPLICATION ACCESSIBILITY AND USABILITY**

**Website**
There is a user-friendly website that contains basic contact information.

**Application**
There is a 3-page user friendly application online that can be downloaded as part of the EE Rebate Guide and Application.

**Requirements**
Financial stability (e.g. credit rating, amount of revenue): An active, valid and non-delinquent customer account is required, along with a U.S. federal tax ID.

Minimum/Maximum number of employees? No.

Does the application process require computer skills? Yes.

Rebate Guide and Application
**PROGRAM**

**Energy-Efficiency Calculated Incentive Program (EECIP)**

**DESCRIPTION**
The EECIP offers a variety of energy-efficiency programs, incentives, services and rebates on qualifying energy-efficient products and improvements in processes designed to help businesses save money and energy. Calculated incentives are awarded at $1 per therm saved annually, subject to program caps of 50% of the project cost or 100% of the incremental measure cost; depending on project type or whichever is less. SoCalGas must be involved from the beginning of the process, prior to equipment selection or final project design. Program specifics include:

- Retrofits saving under 200,000 therms/year require energy analysis.
- Retrofits saving over 200,000 therms/year require customers to provide an energy analysis report approved by a registered professional engineer.
- Leased equipment projects may be eligible on a case-by-case basis.
- Installations of industrial steam traps may be eligible.

**ELIGIBILITY**
Any commercial, industrial or agricultural customer with an active, valid and non-delinquent account.

**APPLICATION ACCESSIBILITY AND USABILITY**

**Website**
There is a user-friendly website that contains basic contact information.

**Application**
Applications must be obtained by account representatives.

**Requirements**
Multiple steps to complete: 1) Contact account representative to submit application; 2) subject project to an energy analysis; 3) proceed with purchase orders and/or equipment purchases; 4) sign a conditional incentive reservation form; 5) install equipment; 6) complete and submit project closure paperwork. Pre- and post-inspections may also be needed.

**SUBPROGRAMS**

**Energy-Efficiency Assessments for Industrial Customers**
No cost, energy-efficiency assessments and evaluation of energy-efficiency projects by engineers who are qualified by the Department of Energy (DOE). Cash payment may be achieved that could reach up to $1 million per project, and up to $2 million per premise, per year. Services include:

CONTINUED ON NEXT PAGE
Energy-Efficiency Calculated Incentive Program (EECIP) (continued)

Site visits and analyses for industrial uses of natural gas—including process heating and steam systems, gas engines, air compressors, oxidizers, and steam turbine drives.

Software modeling/simulation detailing energy use and potential costs and savings including a Steam System Assessment Tool that simulates changes in process steam systems and quantifies potential changes in cost, energy use and emissions; and a Process Heating Assessment and Survey Tool that identifies energy efficiency opportunities by modeling individual pieces of heating equipment.

Self-Generation Incentive Program (SGIP)

The installation of new qualifying technologies that are installed on the customer side of the meter to meet all or a portion of the electric energy needs of a facility. Incentives range from $0.44 to $1.65 per Watt, based on technology type and there is an annual budget of $7.44 million, 75% for Renewable and/or Emerging Technologies (RN/ET) and 25% for Non-renewable (NR) technologies. Eligible technologies include:

- NR: Gas, steam and micro turbines and internal combustion engines
- ET: Biogas, CHP or electric fuel cells and advanced energy storage
- RN: Wind and pressure-reduction turbines and waste heat to power

Savings By Design

For Businesses designing new facilities or expanding existing ones, this program promotes the use of integrated design analysis for large, complex projects or for projects containing innovative energy design features. Available Assistance and Incentives include provision of a customized energy analysis and a recommendation for the best energy efficiency measures to adopt based on proposal; and financial incentives of $1.00 per therm saved annually, up to $500,000 or 50% of project cost (whichever is less). Multiple projects in one year are eligible.

Continuous Energy Improvement (CEI)

Program offered at no cost to businesses that are both a SoCalGas and Southern California Edison customer:

- Improve energy efficiency through maintenance and behavior changes by your own employees
- Leverage existing incentive programs for natural gas and electricity
- Pursue branding and certification programs (such as ENERGY STAR® and LEED for existing buildings)

Businesses gain access to a team of energy experts to help engage with employees. These experts guide you through these steps:
Energy-Efficiency Calculated Incentive Program (EECIP) (continued)

- Assessing current operations
- Strategies for short- and long-term success
- Implementing actions and activities of employees
- Evaluating activities and making improvements, if needed
- Transitioning from consultants to internal staff

**Trade Pro Directory**

An online, searchable directory of trade professionals who sell, service, or install energy-efficient natural gas equipment and are active participants in SoCalGas energy-efficiency programs.

**Resources, Training and Seminars**

Resources to help businesses save money, access programs from other agencies and become more energy-conscious. Also, there are many seminars at the Energy Resource Center, located in Downey offering a variety of technical training, many at no-cost.
PROGRAM

Zero Percent On-Bill Financing

DESCRIPTION
Program offers $5,000 to $100,000 per meter in zero-percent financing to qualified business customers. Loan repayment is billed through monthly gas bill. Loans are unsecured and non transferrable, there is no penalty for early repayment, with a maximum loan term of five years or useful equipment life (whichever is shorter).

Works in conjunction with energy-efficiency programs to provide interest-free financing in addition to rebates and incentives. Examples of energy efficiency programs include: Energy Efficiency Rebates for Businesses and Energy Efficiency Calculated Incentive program. A partial list of qualifying equipment includes: Greenhouse curtains; pipe/tank insulation; high-efficiency fryers; steamers; furnaces, kilns, ovens; heat recovery; waste water heat recovery; boiler economizers; lean-burning natural gas engines; ozone laundry systems; or thermal oxidizers.

ELIGIBILITY
Any nonresidential customers and owners of multifamily units who do not reside on premises.

APPLICATION ACCESSIBILITY AND USABILITY
Website
There is a user-friendly website that contains basic contact information.

Requirements
Customer: An active account in the same business for the past two years and in good credit standing.

Project: Must qualify for at least one of SoCalGas’ energy efficiency programs and the simple payback period for the project must be 5 years or greater, or useful equipment life if it’s shorter than 5 years.

Minimum/Maximum number of employees? No.

Does the application process require computer skills? No.

Air Quality Improvement Program (AQIP) – Clean Vehicle Rebate Project (CVRP)

DESCRIPTION
The Air Quality Improvement Program (AQIP) is a voluntary incentive program administered by the Air Resources Board (ARB) to fund clean vehicle and equipment projects, research on biofuels production and the air quality impacts of alternative fuels, and workforce training. Administered by the Center for Sustainable Energy (CSE) for ARB, the Clean Vehicle Rebate Project (CVRP) offers up to $5,000 in electric vehicle rebates for the purchase or lease of new, eligible zero-emission and plug-in hybrid light-duty vehicles.

ELIGIBILITY
Purchases or leases of selected vehicles are eligible for rebates before exhaustion of available funds within 18 months of the vehicle purchase or lease date. Also, applicant must retain ownership of the vehicle in California for a minimum of 30 consecutive months immediately after the vehicle purchase or lease date.

Zero Emission Motorcycles and Neighborhood Electric Vehicles only:
Evidence of maintenance free batteries (and sealed if lead-acid) and a 24-month warranty is required.

Requirements
Does the application process require computer skills? Yes, applicant must submit the online rebate application on CSE’s website.

What kind of supplemental documents will they need to apply? A signed copy of the CVRP application; vehicle lease or purchase agreement, a copy of a valid CA driver’s license and current registration; and proof of a California-based business. Must all be submitted within 14 days of the application date.

PROGRAM

AQIP – Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP)

DESCRIPTION
The Air Quality Improvement Program (AQIP) is a voluntary incentive program administered by the Air Resources Board (ARB) to fund clean vehicle and equipment projects, research on biofuels production and the air quality impacts of alternative fuels, and workforce training.

The California Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP) helps speed the early market introduction of clean, low-carbon hybrid and electric trucks and buses. HVIP accomplishes this by addressing the biggest barrier to the purchase of medium- and heavy-duty advanced trucks: the high incremental cost of these vehicles in the early market years when production volumes are still low.

ELIGIBILITY
All fleets are eligible—public or private, large or small. Vouchers range from $20,000 to $110,000 for eligible vehicles, depending upon whether the vehicle is hybrid or electric, its Gross Vehicle Weight Rating (GVWR), and whether or not it is located in a disadvantaged community. Please see tables 2 and 3 in the HVIP Year 4 Implementation Manual for the voucher funding levels. (See links in sidebar for eligible vehicles and voucher specifics.)

Requirements

Does the application process require computer skills? Not necessarily. Applicant can see a list of eligible vehicles and HVIP-approved dealers online. Dealer submits voucher application upon vehicle delivery to purchaser.

What kind of supplemental documents will they need to apply? Terms and conditions and any other necessary paperwork will be provided by HVIP-approved dealer.

PROGRAM

AQIP – Providing Loan Assistance for California Equipment (PLACE) Program

DESCRIPTION
The Air Quality Improvement Program (AQIP) is a voluntary incentive program administered by the Air Resources Board (ARB) to fund clean vehicle and equipment projects, research on biofuels production and the air quality impacts of alternative fuels, and workforce training.

Implemented through the California Pollution Control Financing Authority, ARB’s PLACE program is a loan guarantee program offering financial opportunities to on-road fleet owners subject to the Statewide In-Use Truck and Bus Regulation for the purposes of complying with that regulation. Loans may only be used to purchase (not refinance) on-road diesel-powered truck and equipment.

ELIGIBILITY
Eligible purchases with loan proceeds include:
- Used and new tractors equipped with 2007 – 2009 model year engines certified to engine emission standards of 1.20 g/bhp-hr NOx and 0.01 g/bhp-hr PM or cleaner
- Tractors equipped with 2010 and later model year engines ARB-certified to 2010 and later model year emission standards
- ARB-verified diesel emission control devices (exhaust retrofits)

Additionally, fleets must meet all the following criteria:
- Company must be a small business—100 or fewer employees and less than $10 million in annual revenue (averaged over three years)
- Company must have their primary economic effect in California (operate in California a minimum of 51% of total mileage)
- Company must have a fleet of 10 or fewer heavy-duty trucks

Requirements
Financial stability (i.e. credit rating, amount of revenue): Assists to qualify for bonding; designed to help those with credit challenges.

Minimum/Maximum number of employees? No.

Does the application process require computer skills? Maybe. A three page application is available online (see sidebar), but CalCAP lenders and truck dealerships may be able to assist borrower.

Minimum/Maximum number of employees? 100 or fewer employees.

What kind of supplemental documents will they need to apply? Work with CalCAP lenders for supplemental documents.

(See the following page for more info on CalCAP)
PROGRAM

California Capital Access Program (CalCAP)

DESCRIPTION
The CalCAP program encourages banks and other financial institutions to make loans to small businesses that have difficulty obtaining financing. Since inception, CalCAP lenders have cumulatively loaned over $2.2 billion. A recent influx of $84.3 million from the State Small Business Credit Initiative (SSBCI) allows California lenders the opportunity to gain support for years to come.

ELIGIBILITY
See program descriptions below for specific eligibility requirements.

APPLICATION ACCESSIBILITY AND USABILITY

Website
There is a user-friendly website that contains basic contact information.

Application
Applications are provided by individual lenders.

Requirements
Financial stability (e.g. credit rating, amount of revenue): Assistance is provided to qualify for bonding; designed to help those with credit challenges.

Minimum/Maximum number of employees? No.

Does the application process require computer skills? No.

Does the application process require additional technical assistance to complete? Maybe. It depends on the lender.

What kind of supplemental documents will they need to apply? A set of loan enrollment documents are provided online; however these documents are prepared by lenders.

PROGRAMS

CalCAP Loan Loss Reserve
CalCAP Loan Loss Reserve is a form of loan portfolio insurance which may provide up to 100% coverage on certain loan defaults. By participating in CalCAP, lenders have available to them a proven financing mechanism to meet the financing needs of California’s small businesses. The Program allows:

Almost any small business loan, with a few exceptions.

Insurance on a lender’s portfolio of loans. Funds are placed in the loss reserve account as each CalCAP loan is enrolled.

A Lender to enroll all or a portion of a loan, enabling a lender to cover loans beyond its conventional risk threshold whether it is for the entire loan or only a portion.

CONTINUED ON NEXT PAGE
California Capital Access Program (continued)

Lenders to restructure loans by extending the terms of CalCAP loans, amending covenants or releasing collateral.

Lenders to enroll up to $2.5 million for loans as large as $5 million.

A maximum lender/borrower contribution for any single borrower in a three year period of $100,000.

Eligible Uses: CalCAP insures loans made to small businesses to assist them in growing their business. Loans can be used to finance the acquisition of land, construction or renovation of buildings, start-up costs, the purchase of equipment or inventory, other capital projects and working capital. There are limitations on real estate loans, business acquisitions, and loan refinancing. CalCAP prohibits financing certain projects. Examples of ineligible uses of loan proceeds include gambling facilities, bars and adult entertainment businesses.

Eligible Businesses:

- The borrower’s business must be in one of the industries listed in the qualified Standard Industry Classification (SIC) or the North American Industry Classification System (NAICS) codes list.
- The borrower’s primary business and at least 51% of its employees or business income, sales or payroll must be in California.
- The business activity resulting from the bank’s loan must be created and retained in California.
- The small business must be classified as a small business under U.S. Small Business Administration guidelines (Title 13 of the Code of Federal Regulations) and have fewer than 500 employees.

The application is two pages and can be submitted via email or fax.

CalCAP Collateral Support (CalCAP CS)

CalCAP CS pledges cash to cover the collateral shortfall of loans of $50,000 or more. CalCAP CS provides up to 40% of the loan value, with the possibility of an additional 10% for businesses located in a severely affected community.

Eligible Uses: Loan proceeds can be used for start-up costs, working capital, franchise fees, equipment, inventory, and the purchase, construction, renovation or improvements of an eligible place of business. Loan proceeds may be used to purchase any tangible or intangible assets except for goodwill. Lenders may also enroll bridge loans needed prior to the borrower obtaining permanent financing or support, including but not limited to SBA 504 bridge loans. Bridge loans are loans needed prior to obtaining permanent financing or support where the lender is at increased risk pending future take-out financing or guarantee. CalCAP CS prohibits financing of non-business purposes, passive real estate, residential real estate, reimbursing funds owed to an owner, repaying delinquent taxes or taxes held in trust or escrow, business acquisitions where funds are used for goodwill, any portion of a SBA loan or other government guaranteed loan, and those uses prohibited by the State Small Business Credit Initiative guidelines and CalCAP.
Eligible Businesses: An eligible borrower must be in one of the industries listed in the North American Industry Classification System (NAICS) codes list, must not be prohibited by the State Small Business Credit Initiative guidelines or CalCAP, and have 750 employees or fewer. Prohibited business activities include, but are not limited to: adult entertainment, the sale and use of firearms, the sale and use of tobacco and tobacco products, bars and liquor stores, and gambling as further detailed in the SSBCI guidelines and CalCAP regulations. The borrower must have their “Primary Economic Effect” in California where one of the following conditions exists: at least 51% of the total revenues of the business activity or 51% of the total jobs are generated in California.

The CalCAP CS program offers enhanced terms of support for “green” loans, manufacturing loans and loans under $250,000, all further defined as follows:

- Loans to be used primarily for supporting new or expanded business processes, products, services, and tenant improvements consistent with specific state policy goals or regulations furthering energy and water conservation, alternative energy and environmental protection

- Loans to provide working capital to contractors and other businesses providing specific services furthering energy and water conservation, alternative energy and environmental protection

- Loans to be used primarily for new or expanded production of materials and products for use or sale using labor and machines, tools, chemical and biological processing, assembly or formulation

- Loans from $50,000 to $250,000

The lender submits a Collateral Support Request and additional documents throughout the process. The borrower submits a 2-page certification form.

ARB On-Road Heavy-Duty Vehicle Air Quality Loan Program

(See page 40)

Electric Vehicle Charging Station (EVCS) Finance Program

The EVCS Finance Program provides finance incentives to both lenders and borrowers for the purchase and installation of electric vehicle charging stations at California businesses. CalCAP provides rebates to borrowers who participate, and may provide lenders with up to 100% coverage on certain loan defaults.

Eligible Uses: Loans in the EVCS Financing Program can be used for the design, development, purchase, and installation of qualified electric vehicle charging stations in the State of California. The charging station must be accessible to the business owner’s employees, the general public, or to the tenants of a multi-unit dwelling. The charging station must also meet certain technical requirements which the borrower must certify to on the loan enrollment application.

The maximum enrolled loan amount is $500,000 per qualified borrower, and can be insured for up to four years (though the actual term of the loan can be longer). Lenders set the terms and conditions of the loans and decide...
which loans to enroll into the EVCS Program. The EVCS Program contributes 20% of the principal balance enrolled to a loss reserve account. CalCAP will contribute an additional 10%, up to a maximum of 30%, if the installation is in a multi-unit dwelling or located in a “disadvantaged community” as designated in the CalEnviroScreen 2.0. Loans can be short or long-term, have fixed or variable rates, be secured or unsecured, and bear any type of amortization schedule.

Eligible Businesses:

The borrower is a small business defined as: a company, corporation, partnership, firm, or other entity or group of entities that together with its affiliates, has 1,000 or fewer employees.

The borrower has legal control of the EVCS installation site for a term that is equal to or greater than the length of the enrolled loan.

The EVCS installation is located within the boundaries of the State of California.

Businesses submit the two-page loan application and a one-page supplemental EVCS form by email or fax.

**CalCAP Americans with Disabilities (CalCAP/ADA) Financing Program**

Note: this program is still in the program development phase.

Proceeds from loans enrolled in the CalCAP/ADA Financing Program may be used for physically altering or retrofitting existing small business facilities of less than 10,000 square feet if the costs are necessary and allocable for compliance with the Americans with Disability Act (ADA).

Eligible Uses: Proceeds from loans enrolled in the CalCAP/ADA Financing Program may be used for physically altering or retrofitting existing small business facilities of less than 10,000 square feet if the costs are necessary and allocable for compliance with the Americans with Disabilities Act. Eligible costs may also include the cost of surveying facilities, estimating and planning eligible alterations, and other related expenses but do not include business expansion.

The maximum enrolled loan amount is $50,000 and can be insured for up to five years (though the actual term of the loan can be longer). Lenders set all of the terms and conditions of the loans. Loans can be short or long-term, have fixed or variable rates, be secured or unsecured, and bear any type of amortization schedule.

Eligible Businesses: California Small Businesses that meet the following criteria are eligible for the CalCAP/ADA Program:

- Has 15 or fewer full-time equivalent employees.
- Has a total annual gross income from all sources of less than one million dollars ($1,000,000).
- Has facilities with 10,000 or less square feet.
- Does not provide overnight accommodations.
- Is not engaged in activities prohibited by California Code of Regulations §8070 (s) (4) (A).
**PROGRAM**

**Pollution Control Tax-Exempt Bond Financing Program**

**DESCRIPTION**

The Pollution Control Tax-Exempt Bond Financing Program provides private activity tax-exempt bond financing to California businesses for the acquisition, construction, or installation of qualified pollution control, waste disposal, waste recovery facilities, and new equipment.

The CPCFA offers financing as a conduit issuer which means that these bonds are issued on behalf of private business entities by CPCFA. CPCFA does not finance projects directly nor does it make any guarantees related to any bonds it issues on behalf of private corporations. The repayment of the bonds is the responsibility of the private entity on whose behalf the bonds are issued. The primary benefit to the private organization in using tax-exempt bond financing is the lower interest costs than are available through conventional financing mechanisms. Both large and small business projects are eligible for project financing, and assistance is provided to reduce the net cost of financing for small businesses.

A project can potentially involve acquisition of land, buildings, equipment, machinery and furnishings; construction of a new facility; expansion, rehabilitation or replacement of an existing facility; and the costs of architects, engineers, attorneys, permits and bond issuance. Types of projects which may qualify for tax-exempt bond financing include:

- Curbside collection, recycling, materials-recovery, and composting facilities
- Transfer stations
- Landfills
- Waste-to-energy and waste recovery facilities
- Solid or hazardous waste disposal projects
- Collection vehicles and residential waste containers
- Water furnishing and wastewater treatment facilities

**ELIGIBILITY**

A private company may apply for a Qualified Private Activity Bond Allocation for a specific project or program. For large business, financing is provided irrespective of company size. For small business, financing is provided to California businesses that meet the size standards set forth in Title 13 of the Code of Federal Regulations or are an eligible small business, which is defined as 500 employees or less, including affiliates. Eligible small businesses may also qualify for the Small Business Assistance Fund (SBAF) to offset some of the costs borne by businesses related to the bond issuance process, including:

- Bond Counsel
- Borrowers Counsel
- Trustee and Trustee Counsel
- Financial Advisor
- Rating Agency
- STO Agent for Sale
- Printing
- First year LOC fees

PROGRAM

Pollution Control Tax-Exempt Bond Financing Program (continued)

CPCFA Feasibility Study Bank Credit Enhancement
Underwriter and Underwriter Counsel CDLAC and CDIAC fees

Federal restrictions on use of proceeds:
95% of proceeds must be used for the defined project
2% of bond proceeds can be used for costs of issuance
If 25% of bond proceeds are used for land costs the bond loses its
tax-exempt status with exemptions for acquisition of farmland by a first-time farmer or government land purchased for qualified environmental or transit purposes
A public Tax Equity and Fiscal Responsibility Act (TEFRA) hearing must be held before the bonds are issued (this is done by CPCFA or another sponsoring public entity)
To acquire an existing building, a minimum of 15% of the bond proceeds must be used to renovate the building
Average life of the bond issue cannot exceed 120% of the weighted average of the estimated useful life of the assets being financed

APPLICATION ACCESSIBILITY AND USABILITY
Website
There is a user-friendly website that contains basic contact information.

Application
There is a moderately user-friendly 10-page application with 4 pages of guidelines downloadable from the Program Links page.

Requirements
Financial stability (e.g. credit rating, amount of revenue): May need to demonstrate ability to repay the bonds or obtain/provide credit enhancements.
There are many fees associated with the application and the issuance of bonds. Complete fee schedule is available online.
Minimum/Maximum number of employees? Maximum of 500 employees to qualify as a small business.

Does the application process require computer skills? Yes.

Does the application process require additional technical assistance to complete? Yes.

What kind of supplemental documents will they need to apply? None with initial application, but additional documents are required later in the application process and post-issuance to demonstrate tax compliance. All forms are available on the Program Links page.

NOTES
This Guide to Green directory also contains more information in the Federal section on the Small Business Assistance Loan Program which funds the same types of projects listed above. (See page 66 for SBA information)
PROGRAM

Pollution Prevention (P2) – Auto Body and Paint

DESCRIPTION
The DTSC offers numerous resources for auto body and paint shops that were originally included in the California Green Station Program (terminated December 31, 2013). Although the program no longer exists, there remains a significant amount of information online to assist auto body and paint shops to reduce environmental impacts, improve shop efficiency, reduce operating costs and improve workplace health and safety.

Pollution prevention strategies and best management practices are offered to help businesses comply with environmental regulations by reducing smog forming air emissions, reducing and properly managing hazardous waste, and eliminating contaminated storm water releases. Implementing these practices can help save labor, materials and hazardous waste disposal costs, and reduce the potential for environmental violations and fines. These strategies cover:
- Minimizing Paint Waste
- Paint Spray Gun Cleaning
- Solvent Recycling
- Waterborne Coatings
- Sanding Waste Management
- Hazardous Waste Management
- Wastewater Management
- Safer Alternative Thinners, Cleanup Materials, Coatings and Sanding Methods in the Autobody Industry

There is also a list of health and safety resources, guidelines for pollution prevention and waste reduction assessments and many training videos and fact sheets, available in English & Spanish.

ELIGIBILITY
The Auto Body and Paint resources are accessible to anyone with internet access. Alternatively, interested parties may contact the DTSC Office of Pollution, Prevention and Technology Department for a list of available publications.

To access over 50 pollution prevention reports covering many industries, please visit: http://www.dtsc.ca.gov/PublicationsForms/prog_pubs.cfm/?prog=Pollution\%20Prevention

PROGRAM

Pollution Prevention (P2) – Metal Finishing Shops

DESCRIPTION
Assists metal finishing firms to eliminate or reduce waste, conserve energy and water, reduce operating costs, increase compliance with environmental regulations and improve employee health and safety. Participants may receive compliance assistance and an on-site pollution prevention assessment and training free of charge. Acceptance is based on eligibility and the order in which the applications are received.

Program participants are also eligible to apply for the Metal Plating Facility Loan Guarantee Program offered by the Business Transportation and Housing Agency to obtain a loan guarantee to upgrade, replace or purchase new equipment to implement pollution prevention measures and/or to meet or exceed regulatory requirements.

ELIGIBILITY
Any small, medium or large metal finishing business is eligible if the business has no pending enforcement action from any local or state agency, has fulfilled all terms of any prior enforcement actions taken against the business; and is undergoing corrective action and is in good standing with their consent agreement. Only a limited number of businesses are accepted into this program on a yearly basis.

APPLICATION ACCESSIBILITY AND USABILITY
Website
There is a user-friendly website that contains basic contact information.

Application
No application is available online. Call or email to receive application.

Requirements
Financial stability (e.g. credit rating, amount of revenue): Businesses must not have any pending enforcement actions or be under investigation by any federal, state or local agency. If a company has had compliance problems in the past, but has since corrected the problems (i.e. completed payment of any assessed penalties or fines), they can participate in the program.

Minimum/Maximum number of employees? No.

Does the application process require computer skills? No.

Does the application process require additional technical assistance to complete? No.

What kind of supplemental documents will they need to apply? Business, regulatory and pollution prevention information are needed.

**Pollution Prevention (P2) – Vehicle Service and Repair**

**DESCRIPTION**

The DTSC offers training and support materials for vehicle service and repair shops that were originally included in the California Green Station Program (terminated December 31, 2013). Although the program no longer exists, there remains a significant amount of information online to assist vehicle service and repair shops that want to improve workplace health and safety and lower their operating costs through the reduction of energy and water consumption and proper disposal of solid and hazardous waste.

Cost saving measures include:
- Aqueous Brake Washing
- Aqueous Parts Cleaning
- Oil Water Separators
- Refillable Spray Bottles
- Reusable Oil Filters
- Waste Antifreeze Recycling

The website offers free fact sheets, training modules, and other resources and support materials to identify and put to use the economic and environmental benefits of:
- Pollution prevention methods
- Products and services within the private sector
- Local government agencies
- Vehicle repair and fleet maintenance operations
- Identifying typical hazardous wastes

There is also a resources page which includes a services/equipment/supplies directory, cost-saving case studies, information on recycled-content product purchasing and materials exchanges and other forms of business assistance.

**ELIGIBILITY**

The Vehicle Service and Repair resources are accessible to anyone with internet access. Alternatively, interested parties may contact the DTSC Office of Pollution, Prevention and Technology Department for a list of available publications.

REVOLVING LOAN FUND PROGRAM (RLF)

DESCRIPTION
Facilitates the reuse and/or redevelopment of hazardous substance release and petroleum sites by making low cost financing available for the cleanup of eligible public or privately held properties. Loans help developers, businesses, schools, and local governments clean up and redevelop brownfields and other underutilized properties.

ELIGIBILITY
Loans may be provided to eligible governmental, private or nonprofit entities and other persons, such as site owners or developers, with control over or access to a brownfield site, provided that the property is not currently owned by a party responsible for the environmental contamination of the site. Sub-grants may be given to eligible governmental entities or nonprofit organizations. Pre-cleanup site assessments are ineligible. Eligible sub-grantees must own the site and are limited to states, political subdivisions, U.S. Territories, Indian tribes, and nonprofits.

Property(ies) must meet the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) definition of a brownfield site: “…real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant.” (Note: If the only pollutant is petroleum, the Cal/EPA Lead Agency Determination process will be used to confirm DTSC as the site lead agency prior to proceeding with the application.)

Properties on, or proposed for, the National Priorities List and those undergoing, or pending a response or enforcement by a Federal or State agency are also ineligible, and there must be a completed site assessment/investigation and approved remediation plan.

APPLICATION ACCESSIBILITY AND USABILITY
Website
There is a user-friendly website that contains basic contact information.

Application
A Borrower Eligibility Criteria Checklist, Brownfields Loan Application, Revolving Loan Fund Applicable Laws Statement and Hazardous Substances Site Eligibility Evaluation and/or the Petroleum Site Evaluation Eligibility Evaluation are all required and available online.
Revolving Loan Fund Program (RLF) (continued)

Requirements
Financial stability (e.g. credit rating, amount of revenue): Traditional financing eligibility applies for loans.
Minimum/Maximum number of employees? No.
Does the application process require computer skills? No.
Does the application process require additional technical assistance to complete? Perhaps. Supporting information regarding contamination history and actions taken by owner related to the disclosure of site contamination during land purchase may be required.
What kind of supplemental documents will they need to apply? Once site and borrower eligibility have been determined by the Revolving Loan Fund Committee, applicants are required to submit personal financial statements and a non-refundable $500 loan application fee.

PROGRAM

Property Assessed Clean Energy (PACE) Financing

DESCRIPTION
The PACE Program works with partners and lenders to make affordable financing available for home, commercial and small business improvements that will reduce energy use or promote water conservation. These costs may be financed via property tax bills or utility charges. Property owners in a PACE-designated area can use PACE money to retrofit their homes without putting any money down. The PACE program’s goal is to provide more business for local energy efficiency contractors who will employ more technicians, while California communities benefit from lower energy costs and less pollution.

ELIGIBILITY
Applicants for PACE financing must be the legal property owner of record and must be current on their mortgage payments and all taxes. To qualify, a parcel should have no recorded bankruptcies within the past 5 years and a lien to value ratio of 100%, i.e. the assessed property value should be equal to or exceed the mortgage balance. There is no minimum FICO score required to qualify. Because PACE is based strictly on property values, project improvements can be financed from a minimum of $5,000 well into the millions of dollars.

PACE funds can be used for energy audits and materials and labor costs of permanently-installed improvements that reduce a building’s use of grid-supplied energy or water. Solar photovoltaics (PV) and solar water heating (and the rooftop improvements to support them); wind and geothermal; cool roofs; heating and air conditioning (HVAC); energy-efficient lighting; windows, door and elevator upgrades; boilers and chillers; water treatment and conservation improvements, fixtures, xeriscaping and electric vehicle charging stations are some of the projects eligible for financing under the program.

Further, many of the improvements PACE financing supports qualify for federal tax credits of up to 30%, energy rebates and state cash incentives of up to $500,000, all of which can be combined to lower energy costs, accelerate payback and enhance monthly savings.

QUALIFIED LENDERS

**EERE Advanced Manufacturing Office (AMO)**

**DESCRIPTION**

Helps manufacturers improve energy efficiency and adopt state-of-the-art technology and energy management practices. AMO offers tools, training, assessments and other resources to help companies identify the most cost-effective options for reducing the life-cycle energy consumption of manufactured goods.

The AMO home page provides information on a variety of support for manufacturing operations, including:

**Technical Assistance:** Supports the deployment of manufacturing technologies and practices to increase productivity and reduce water and energy use. Programs include strategic energy management, an industrial energy efficiency and CHP working group, Boiler MACT TA, water and energy system integration, industrial assessment centers and the ISO 50001 Energy Management Standard.

Businesses that sign up for the Better Plants Program and pledge to reduce their energy intensity by 25% over a ten year period benefit from DOE technical support and are able to implement cost-effective energy efficiency improvements that save energy and improve competitiveness.

**Financial Assistance:** Provides funding to pursue innovative technology, R&D and increase energy efficiency across the manufacturing sector. Solicitations may involve collaborative partnerships among manufacturers, universities, suppliers, national labs, and others. Funding is awarded through an open, competitive process. Project selections are based on merit-based criteria that emphasize potential energy, environmental, and economic benefits. Subscribe to the AMO News listserv to receive e-mail announcements about upcoming solicitations (see sidebar).

**Information Sources:** Many resources are available from AMO to help manufacturers improve energy efficiency, including technical publications, industrial assistance and project databases.

**Research and Development:** Projects, such as Small Business Innovation Research (SBIR) explore novel energy-efficient, next-generation materials and innovative process technologies for both specific industry sectors and a wider range of manufacturing industries. AMO’s R&D projects also pursue foundational or advanced energy technologies for multiple industry sectors and contribute to quantifiable energy savings.

EERE Building Technologies Office (BTO)

**DESCRIPTION**

Develops technologies, techniques, and tools for making buildings more energy efficient, productive, and affordable. Resources include energy modeling tools, design and retrofit guides, building energy codes, appliance standards, workforce development opportunities and a resource database. The website provides information and resources for industry to help reduce the energy use of new and existing buildings.

Commercial building owners and operators may use the guides, case studies, and other tools developed by the DOE to take action to save energy, take advantage of tax incentives offered by the federal government for energy efficiency features, evaluate the potential for energy efficiency based on different building characteristics using the Buildings Performance Database’s national dataset, and collect, store and analyze energy performance information about large portfolios of buildings with the Standard Energy Efficiency Data platform.

**ELIGIBILITY**

Commercial building owners and operators that purchase and install energy-efficient equipment or make energy efficiency improvements to buildings.

PROGRAM

Section 3 Business Registry Program

DESCRIPTION
The U.S. Department of Housing and Urban Development (HUD) is initiating a Section 3 Business Registry pilot program in Los Angeles County and four other metropolitan areas. Through this new registry, businesses that hire low income individuals, or are composed of low income individuals, will be able to have better access to information about contracting opportunities with housing authorities, local governments and other HUD-funded entities. The pilot registry will also make it easy for workers to find out about Section 3 companies that are hiring.

ELIGIBILITY
The HUD Section 3 program requires that recipients of HUD financial assistance based on income, to the greatest extent possible, provide job training, employment, and contract opportunities for low- or very-low income residents in connection with projects and activities in their neighborhoods. A Section 3 covered project involves the construction or rehabilitation of housing (including reduction of lead-based paint hazards), or other public construction such as street repair, sewage line repair or installation, updates to building facades, etc. Under the Pilot Program, eligible businesses can certify that they meet one of the regulatory definitions of a Section 3 business and submit publicly available information about their firm (i.e. business name, address, type of services provided, etc). Certified businesses will then be included in a searchable online database. A Section 3 business is defined as: a) having 51% or more owned by Section 3 residents; or b) having at least 30% of its full time employees include persons that are currently Section 3 residents, or were Section 3 residents within three years of the date of first hire; or c) if a business can provide evidence of a firm commitment to subcontract a minimum of 25% of the total dollar amount of contracts to a business that meets the criteria listed in (a) and/or (b). A Section 3 resident is defined as: 1) a public housing resident; or 2) a low- or very low income person residing in the metropolitan area or non-metropolitan county where the Section 3 covered assistance is expended.

Small and Disadvantaged Business Enterprise (SDBE) Assistance

**DESCRIPTION**

*NOTE: These procurement opportunities are for transportation contracts. For information about government contracts for all SDBEs, see the U.S. Small Business Administration loan programs near the end of this guide.*

The Office of Small and Disadvantaged Business Utilization (OSDBU) in the U.S. Department of Transportation (DOT) helps qualifying businesses compete for DOT’s contracting and subcontracting dollars and other financial opportunities. This is primarily carried out through three areas of focus:

**FINANCIAL ASSISTANCE**

Programs providing eligible small and disadvantaged businesses with access to the financial capital and capacity they need to compete in the transportation industry. These programs are administered through the Southwest Region Small Business Transportation Resource Center (SBTRC).

**Short Term Lending Program (STLP):** A maximum loan of $750,000 with a variable interest rate tied to the Wall Street Journal’s Prime Rate. Initial loan terms are for one-year with the ability to request annual renewals up to 5 years. Line of credit may be increased with additional contacts acquired during loan tenure. Eligibility guidelines include established businesses that are DBE or SBA Certified under Section 8(a), Small Disadvantaged Business, HUBZone Empowerment contractors and Service-Disabled Veterans. Startup businesses are ineligible. Funds are not available for equipment purchases; long-term debt; debt refinancing; payment of back-taxes; stockholder payments; or 100% contract mobilization. There is typically a 30 to 60 day turnaround time.

An application, supplemental documents and guidelines are available online. Supplemental information includes personal financial statements, income tax returns, cash flow projections, accounts receivable and payable, a company profile, certification that all taxes are current and business references. Completed loan applications should be sent to the Participating Lender (PL). A PL directory is provided online. The Southwest Region SBTRC offers technical assistance in the application process.

**Bonding Education Program (BEP):** Provided by the DOT, in partnership with The Surety and Fidelity Association of America (SFAA) to help small businesses overcome the challenges to becoming bond ready.

SDBE Assistance (continued)

through educational workshops, one-on-one sessions with local surety bonding professionals and follow-up support. Companies must register and attend a series of workshops.

To be considered for the program, applicants must be the primary owner, key manager or administrator of a business pursuing transportation-related contracts with construction experience and at least two years in business; a minimum annual revenue of $250,000; two full time employees (including owner) or more and have one of the following certifications/designations: Small Businesses, DBE, HUBZone, SDB, Service Disabled Veteran Owned Business, Veteran Owned Small Business, Women Owned Small Business or 8(a). Consultants, developers and engineering firms are not eligible for the program.

PROCUREMENT ASSISTANCE

Supports for small businesses to participate in DOT's direct procurement and federal financial assistance programs. This is carried out by the Office of the Senior Procurement Executive, and Small Business Specialists within the eleven Operating Administrations (OAs) of the DOT (e.g. Federal Aviation Administration, Federal Highway Administration, Federal Railroad Administration, Federal Transit Administration, and others).

The Procurement Assistance Division counsels small businesses as well as mediating/resolving procurement-related issues; and provides administrative oversight and tools to increase small business participation including:

* **DOT Procurement Forecast:** A dynamic database, released the first day of each fiscal year (October 1st), that provides information on anticipated procurements over the simplified acquisition threshold ($150,000).

* **Implementing Partnership Agreements with SBA:** The DOT and the Small Business Administration (SBA) have a Partnership Agreement (PA) in place to simplify the award of 8(a) Contract requirements, which are "????" and are listed in the SBA section

* **Subcontracting on DOT Opportunities:** Tools are available for small businesses with limited resources, staffing, capital, or experience including the DOT Subcontracting Directory and online Subcontracting Network (Sub-Net).

* **Disadvantaged Business Enterprise Program**

This program is administered by the California DOT Office of Business & Economic Opportunity (OBEO) and is listed in the State Section of this Guide.

SDBE Assistance (continued)

ELIGIBILITY

Firms that have received DBE (disadvantaged business enterprises) certification from a state or local transportation agency, and firms that have been certified by the SBA as an 8(a), Small Disadvantaged Business (SDB), Historically Underutilized Business Zone (HUBZone), or Service Disabled Veteran Owned Small Business. Businesses engaged in work that involves the maintenance, rehabilitation, restructuring, improvement, or revitalization of any of the nation’s modes of transportation are also eligible, as well as businesses engaged in work for any public or commercial provider of transportation of any federal, state, or local transportation agency. Small businesses not classified as disadvantaged are also eligible for some programs. To be eligible as a small business concern, your business must satisfy the SBA’s size standard for your industry, be operated for profit, be independently owned and operated, and be based in the U.S., making significant contributions to the U.S. economy. The U.S. Small Business Administration (SBA) has an online Size Standards Tool to look up specific industry criteria and determine if your business qualifies (see sidebar).

PROGRAM

Lean Manufacturing Program

DESCRIPTION
The U.S. EPA Lean Manufacturing Program is a technical assistance program established to assist businesses to adopt “lean manufacturing” practices. “Lean manufacturing” is a business model and collection of tactical methods that emphasize eliminating non-value added activities (waste) while delivering quality products on time at least cost with greater efficiency. Lean implementation is expanding throughout manufacturing and service sectors such as aerospace, automotive, electronics, furniture production, and health care as a strategy to create a competitive advantage. The focus of lean manufacturing is on driving rapid, continual improvement in cost, quality, service, and delivery. Significant environmental benefits typically occur as a result of these production-focused efforts. Lean production techniques often create a culture of continuous improvement, employee empowerment, and waste minimization, which is compatible with organizational characteristics encouraged under environmental management and pollution prevention systems.

The website also provides a lean manufacturing resources page that features several toolkits, including:

- Lean and Environment,
- Lean, Energy and Climate
- Lean and Chemicals
- Lean and Water

Asbestos and Small Business Ombudsman (ASBO)

DESCRIPTION
The Asbestos and Small Business Ombudsman (ASBO), under the Office of the EPA Administrator, serves as a conduit for small businesses to access the EPA and facilitates communications between the small business community and the EPA. They support the environmental and compliance performance of small businesses while reducing the regulatory burden on small businesses, including the cost of compliance and the adverse impact on business operations through representation and collaboration. The ASBO Team advocates for small business issues, partners with state Small Business Environmental Assistance Programs (SBEAPs), small business trade associations, EPA headquarters and regional offices, the Small Business Administration (SBA) and other federal agencies to reach out to the small business community.

The ASBO operates a toll-free hotline for the convenience of small businesses, trade associations, and the general public, seeking free, confidential help as it relates to asbestos and a variety of environmental regulatory topics. A member of the ASBO staff will answer calls between 8:30 a.m. and 4:30 p.m. EST.

PROGRAM

Loan Guaranty Programs

DESCRIPTION
Loans for businesses that are otherwise unable to obtain a conventional bank loan. SBA does not make direct loans to small businesses. Rather, SBA sets the guidelines for loans, which are then made by its partners (lenders, community development organizations, and microlending institutions). The SBA guarantees that these loans will be repaid, thus eliminating some of the risk to the lending partners. So when a business applies for an SBA loan, it is actually applying for a commercial loan, structured according to SBA requirements with an SBA guaranty.

The loan guaranty programs can generally be put into three categories:

STARTUP OR EXPANSION LOANS
- Basic 7(a)
- SBA Express
- Microloans
- Certified Development Company (CDC)/504

SPECIAL PURPOSE LOANS
- CAPLines
- Community Advantage
- Veteran’s Advantage

EXPORT ASSISTANCE LOANS
- Export Working Capital
- Export Express
- International Trade

There are also other SBA resources for Disadvantaged Business Owners

EMERGENCY LOANS
- Disaster Assistance
- Economic Injury
- Military Reservists

DISADVANTAGED BUSINESS ASSISTANCE PROGRAMS
- 8(a) Business Development Program
- Historically Underutilized Business (HUB) Zone Program
- Women Owned Small Business Program
- Service-Disabled Veteran-Owned Small Business Program

ELIGIBILITY
Intermediary lenders are responsible for officially approving the loans, but approval is generally easier due to SBA loan guarantees for

qualifying businesses. The SBA website provide tools to help businesses understand common credit factors that financial institutions use to determine credit worthiness. Specific SBA requirements vary by loan program, but generally speaking, applicants must be for-profit businesses operating in the United States that have reasonable owner equity to invest and not be able to obtain full funding from personal equity and/or traditional lending sources.

In addition to these basic requirements all loan programs require businesses to meet the SBA Size Standards for what constitutes a “small” business which vary by specific North American Industry Classification System (NAICS) codes. The SBA website provides an online Size Standards Tool and a downloadable chart of SBA Size Standards by specific six-digit NAICS codes. CDC/504 loans are the exception to this rule and use a simplified alternative size standard requiring all businesses to not exceed $15 million in tangible net worth and to not have an average two full fiscal year net income over $5 million.

There are only a few types of legal businesses that are not eligible, including those in the financial industry; gambling operations; most developers, landlords and private clubs; life insurance companies; pyramid marketing operations; those involved in the promotion of religious beliefs; consumer and marketing cooperatives (producer cooperatives may be eligible); businesses engaged primarily in speculation; those that profit from products depicting indecent sexual activities; and political or lobbying organizations.

The SBA requires every loan to be fully secured, but will not decline a request to guarantee a loan if the only unfavorable factor is insufficient collateral, provided all available collateral (both business and personal) is offered. The SBA requires guarantees from all owners with a 20% or greater share equity of the business, while lender may require the same of those owners with under 20% interest. Liens on personal assets of the principals may be required. See the chart on the following pages for requirements unique to the individual loan programs.

APPLICATION ACCESSIBILITY AND USABILITY

Requirements
Financial stability (e.g. credit rating, amount of revenue): Determined by third-party lenders.

What kind of supplemental documents will they need to apply? A business plan, financial and credit reports, legal documents (i.e. leases, etc), tax returns, and verification of collateral (varies with the loan size and type) are needed to apply.

LOAN PROGRAMS

STARTUP OR EXPANSION LOANS

Basic 7(a) – The most basic of the loan programs administered by the SBA. Basic 7(a) loans up to $5 million may be used to establish a new business or to assist in the acquisition, operation, or expansion of an existing business. Borrowers must apply through a participating lender institution.

SBA Express – A 7(a) loan with a turnaround time of 36 hours. Lower interest rates are often available to businesses that apply through an Express program, but they have a maximum loan amount of $350,000 and 50% guaranty limit.

Microloans – Provides short-term loans up to $50,000 through specially designated intermediary nonprofit community-based organizations with experience in lending as well as management and technical assistance, which they are required to provide to borrowers. Businesses may be required to fulfill training and/or planning requirements. Applications are submitted to local intermediaries and all credit decisions are made on the local level. To find an local intermediary, inquiries should be made through the Los Angeles SBA District Office.

Certified Development Company (CDC)/504 – A long-term financing tool designed to provide small businesses with long-term, fixed-rate financing to acquire major fixed assets, such as land and buildings. It encourages economic development within a community secured from a CDC, which is a private, community-based nonprofit corporation set up to contribute to economic development in a particular community. A CDC/504 project may include allows for 100% of the project cost to be covered either by a 10% or greater contribution of borrower equity, a senior lien up to 50% from a private lender, and a junior lien up to 40%, backed by a 100% SBA-guaranteed debenture secured through a CDC.
SPECIAL PURPOSE LOANS
CAPLines – Loans up to $5 million for short-term and cyclical working capital needs carried out through four loan programs: the Seasonal Line of Credit Program, supporting the buildup of inventory, accounts receivable or labor and materials above normal usage for seasonal inventory; the Contract Loan Program for costs associated with contracts, subcontracts or purchase orders; the Builders Line Program for small contractors or developers to construct or rehabilitate residential or commercial property that will be sold to a third party; and the Working Capital Line of Credit Program, a revolving line of credit providing short-term working capital with specific requirements for repayment.

Community Advantage – Loans up to $250,000 that expand access to capital for small businesses and entrepreneurs in underserved communities in order to drive economic growth and job creation through community-based, mission-focused financial institutions which were previously not able to offer SBA loans.

Veteran’s Advantage – Loans for small businesses owned (51% or more) by one of the following groups: Veterans (other than dishonorably discharged); Service-Disabled Veterans; Active Duty Military service member participating in the military’s Transition Assistance Program (TAP); Reservists and National Guard Members; spouses of the above groups; or widowed spouse of a service member who died while in service or service-connected disability. This program has been renewed for 2016, but it is very difficult to find current links online. See chart for further details and contact the California Veteran Business Outreach Center at 916-527-8400 for assistance with application procedures.

EXPORT ASSISTANCE LOANS
Export Working Capital – An export loan program provided through a network of SBA Senior International Credit Officers located in U.S. Export Assistance Centers throughout the country. Exporters can apply for loans in advance of finalizing an export sale or contract. Benefits include financing for suppliers, inventory or production of export goods; export working capital during long payment cycles; financing for stand-by letters of credit used as bid or performance bonds or down payment guarantees; reserves domestic working capital for the company’s sales within the U.S.; permits increased global competitiveness by allowing the exporter to extend more liberal sales terms; increases sales prospects in under-developed markets which have high capital costs for importers; contributes to the growth of export sales; and low fees and quick processing times.
Loan Guaranty Programs (continued)

**Export Express** – Streamlined financing up to $500,000 for businesses in operation, in exporting or otherwise, for at least 12 full months and can demonstrate that the loan proceeds will support export activity. May take the form of a term loan or a revolving line of credit. May be used for direct or indirect exporting.

**International Trade** – Loans to businesses that plan to start or continue exporting, or that have been adversely affected by competition from imports. The proceeds of the loan must enable the borrower to be in a better position to compete. The program offers borrowers a maximum SBA-guaranteed portion of $1.75 million. Funds may be used for long term fixed assets or for the refinancing of an existing loan used for these purposes.

**Other SBA Resources for Disadvantaged Business Owners**

**EMERGENCY LOANS**

**Disaster Assistance** provides financial assistance to victims of disasters or to individuals in a declared disaster area;

**Economic Injury** assists small businesses, small agricultural cooperatives and nonprofit organizations as they recover from economic losses resulting from physical disaster or an agricultural production disaster.

**Military Reservists** offers funds to meet ordinary and necessary operating expenses unable to be met because key employee was “called-up” to active duty as a military reservist.

**DISADVANTAGED BUSINESS ASSISTANCE PROGRAMS**

**The 8(a) Business Development Program** provides managerial, technical, and contractual assistance to small disadvantaged businesses.

**The Historically Underutilized Business (HUB) Zone Program** helps those small businesses employing staff who live in a HUBZone and maintain a “principal office” in a HUBZone gain preferential access to federal procurement opportunities. Most of South and East Los Angeles, Port areas, portions of the northeast and central San Fernando Valley, and many other places in the Los Angeles Metropolitan Area qualify as HUBZones. A map is provided to determine HUBZone eligibility by address.

**The Women Owned Small Business Program** authorizes contracting officers to set aside certain federal contracts for eligible women-owned small businesses.
The Service-Disabled Veteran-Owned Small Business Program provides procuring agencies with the authority to set acquisitions aside for exclusive competition among service-disabled veteran-owned small business concerns.

COLLABORATIVE FOR ENVIRONMENTAL HEALTH AND JUSTICE

The Los Angeles Collaborative for Environmental Health and Justice was formed in 1996 when the Liberty Hill Foundation joined with academic researchers and community-based organizations to study, fund and support the growing field of environmental health and justice. Participants in the LA Collaborative for Environmental Health and Justice have included:

Coalition for a Safe Environment
Communities for a Better Environment
East Yard Communities for Environmental Justice
Liberty Hill Foundation
Urban and Environmental Policy Institute, Occidental College
Pacoima Beautiful
University of California Berkeley, School of Public Health and Department of Environmental Science, Policy and Management
University of Southern California, Program for Environmental and Regional Equity
Union de Vecinos
